

WT 7350 GALAXY MAGNET CLOCK

Instruction Manual

1. Attaching the markers

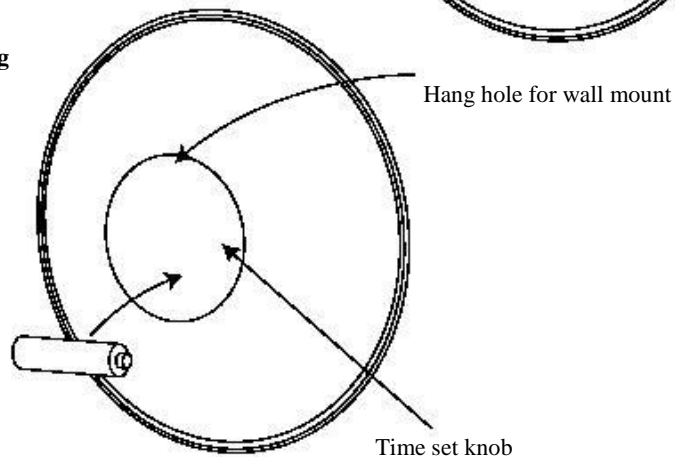

The inner most orbit is the seconds.
The middle orbit is the hours.
The outer orbit is the minutes.

2. Battery cover and desktop stand

3. Wall mount and Time Setting

Instructions:

1. Place the clock with face of the clock facing upwards and to be parallel with the surface of your desk. Carefully slide the three markers on the appropriate orbits until the markers are held in place by the magnets.
2. Tilt the clock up to adjust the time with the time set knob.
3. The clock uses 1 'AA' size alkaline battery and match the polarity as marked on the clock.

Attention:

Remove tapes at the back of the clock applied for shipment purpose.

Warning:

This is not a toy. Contains small parts that may pose a choking hazard. Keep out of reach of children.

It's recommended to shake the balls to loosen the magnet prior to placing the balls on the clock.

If the ball(s) are not rolling smoothly on the surface, remove and replace the balls.

The balls should be rolling on the surface smoothly.

Consideration of duty according to the battery law

Old batteries do not belong to domestic waste because they could cause damages of health and environment. You can return used batteries free of charge to your dealer and collection points. As end-user you are committed by law to bring back needed batteries to distributors and other collecting points.
