

Suction Cup Window Thermometer

Model No.: WS 7024

Instruction Manual

Battery Installation and °C/°F selection

(See above illustrations 1~2)

- Pull the bottom housing and battery holder away from the top housing.
- Insert the battery according to the polarity markings.
- Slide the selector switch to either Fahrenheit or Celsius.
- Re-attach the top and bottom housings.

Convert from Outdoor to Indoor Use (See above illustrations 3~6)

Your suction cup thermometer is assembled for outdoor use. If you want to attach the thermometer to the inside of the window, follow these steps;

- Pull the bottom housing away from the top housing.
- Pull the suction cup away from the top housing.
- Rotate the bottom housing and suction cup 180 degrees.
- Push the suction cup into place.
- Re-attach the top and bottom housings.

Install the Thermometer

The thermometer can be mounted to a window, mirror, or any clean and smooth, non-porous surface. Suction cups will not hold on wood or plaster.

- Clean surface of any oils or other foreign matter.
- To attach the thermometer, press firmly the suction cup attaches to the housings, making sure the suction cup makes a tight bond with the mounting surface.

Do not use in direct rain and direct sunlight.
